

## Avocado Plant

What you will need:

- 2-4 avocado seeds
- toothpicks
- water
- sunny window

**Step 1:** Remove the avocado pits from the center of the avocado and rinse off the meat from the avocado.

**Step 2:** Put several toothpicks around the center of each avocado seed.  
\*The tear shape part of the seed is the top where the leaves will grow and the narrower part is where the stems will grow.

**Step 3:** Place the narrow end of the seed in the glass of water with toothpicks laying around the rim of the cup.

**Step 4:** Place the avocado seeds in a sunny window.

**Step 5:** Once your roots are about 2-3 inches long transfer to a pot of soil.

**Step 6:** Watch your avocado plant grow!
